### DETAILED ACTION

1. Acknowledgment is made in the receipt of the amendment filed April 15, 2004.

#### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 6-13 and 15-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 6-13 and 15-17 of U.S. Patent No. US 6,655,756 to Riddiford et al. in view of US 5,496,102 to Dimatteo et al.

Although the conflicting claims are not identical, they are not patentably distinct from each other because Riddiford et al. teaches estimating the chamber pressure in the actuator apply chamber rather than sensing the chamber pressure in the actuator apply chamber (as recited in the instant application). However, Dimatteo et al. teaches that it is known in the art to use sensors to provide actuator apply chamber pressure information to the controller, this information is considered an accurate estimation of chamber pressure. It would have been obvious to one of ordinary skill in the art to have provided the system of Riddiford et al. with sensing means as the apply chamber as taught by Dimatteo et al., thus producing the best estimate of the apply chamber pressure.

*Allowable Subject Matter*

4. Claims 1-5, 14 and 18-20 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: with regards to claims 1 and 14, the prior art of record fails to anticipate or render obvious a force generating apparatus and method for modifying an electrical force signal of the force generating apparatus, wherein the signal is modified to limit the rate at which fluid pressure in the apply chamber is reduced during a fast release mode to a predetermined rate low enough to preclude a change in modulus of the fluid during fast mode release; with regards to claim 5, the prior art of record fails to anticipate or render obvious a force generating apparatus, wherein an electrical signal is modified during fast mode release, and wherein a solenoid is located between an apply chamber of the force generating apparatus and a force applying element.

*Response to Arguments*

6. Applicant's arguments filed April 15, 2004 have been fully considered but they are not persuasive. It is the opinion of the examiner that the phrase "sensing" does not render the claim non-obvious in view of the art.

*Conclusion*

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3683

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
